*on basket type  
cable trays*

Complete and  
innovating solutions  
for the bonding to the earth of cable trays

SICAME GROUP

# Equipotential bonding of cable trays

## No tools are required

# T'CLIP<sup>®</sup>

on perforated  
cable trays

CE

### General features

T'Clip is qualified according to the standard  
EN 61439-1

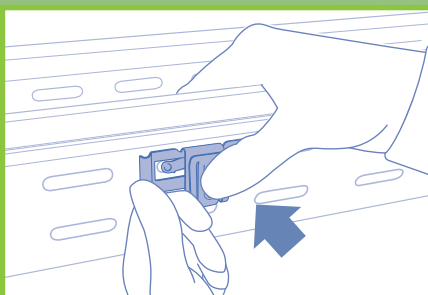

- ✓ Material: steel.
- ✓ Plating: tin.
- ✓ Packaging by 30.

Part number	Item code	Capacity
TCLIP16-35	7341981	Clip for uninsulated earthing conductor 16 to 35 mm <sup>2</sup> Clip for wall thickness < 1.5 mm

 **FIXING TIME  
APPROXIMATELY  
5 TIMES FASTER  
THAN TRADITIONAL METHODS\***  
**PATENTED SYSTEM**

\* Compared to bolted solutions (clamp type)

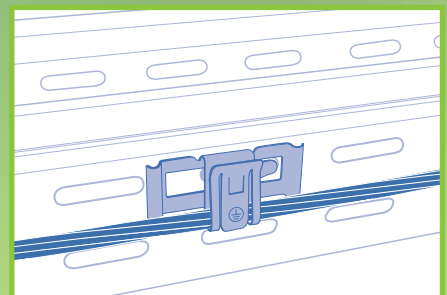

### Quick and easy installation in 3 steps without any tool

Press T'CLIP against the cable tray.

Push it laterally towards the left side until it has been locked.

Insert the uninsulated earthing cable into the clip and lock.

**Standard NF C 15-100 / Reminder:** installed each 15 to 20 meters at least, according to the principle of safety, the systems link the cable trays to the parallel copper conductor in order to ensure the bonding to the earth.

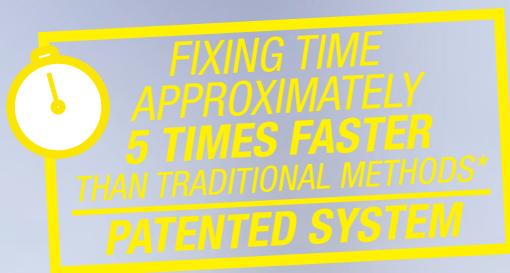

CE

### General features

F'clip is qualified according to the standard EN 61439-1

- ✓ Material: steel.
- ✓ Plating: tin.
- ✓ Packaging by 40.

Part number	Item code	Capacity
FCLIP16-35	7341980	Clip for uninsulated earthing conductor 16 to 35 mm <sup>2</sup> Clip for wire Ø 3 to 5 mm

\* Compared to bolted solutions (clamp type)
